

Auto Paint Cloud Formula System

Santint Auto Paint Management System is a prospective tinting management system independently developed by Santint.

It provides tinting management solutions for both laboratory and end user globally.

With Santint Auto Paint Management System Client, you can be an auto paint tinting expert without expertise.

Features

1. Formula Management

- ▶ Formula input, audit, push and re-audit.
- ▶ Multilingual management of formula data.
- ▶ Data summary and statistics of end users.

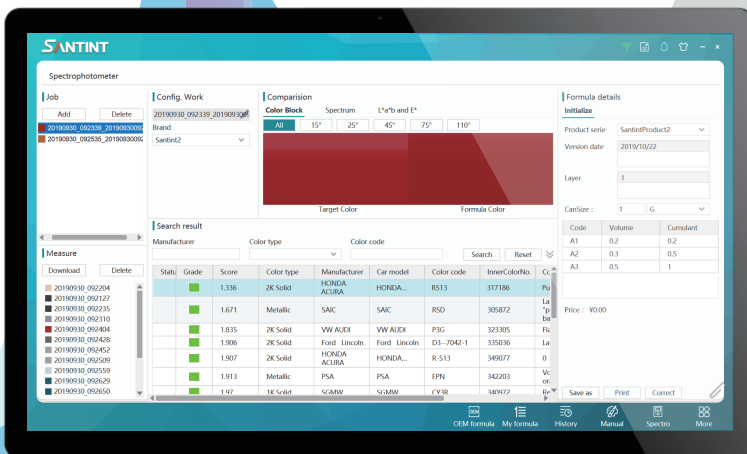

2. Laboratory formula

- ▶ Create, fine adjust and verify the formulas.
- ▶ Unified management of work task list.
- ▶ Real-time submit and distribute the formula.

3. Cloud Management

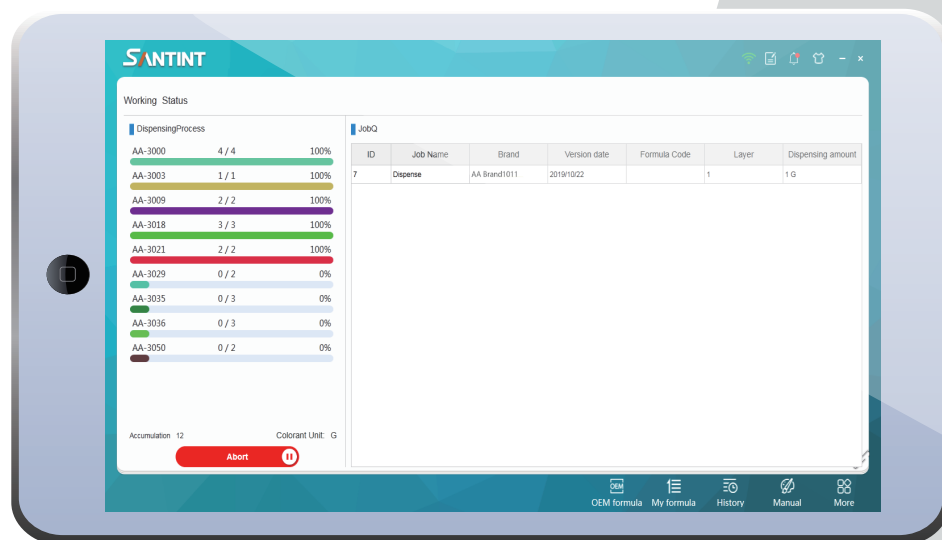

- ▶ Formula data are real-time distributed all over the world according to different strategies through cloud computing.
- ▶ Collect the machine and software information of end users.
- ▶ Real-time manage customers and terminals.

4. Formula query

- ▶ Multi-platform, multi-channel (PC, tablet, mobile, web page, Wechat)
- ▶ Spectrophotometer automatically searches and corrects color.
- ▶ Multi-lingual version and localization of formula data.
- ▶ Ergonomic interface design helps you quickly search formula.

5. Tinting Management

- ▶ Multi-task queue driver makes tinting easier.
- ▶ Compatible for types of electronic scales.
- ▶ Real-time store and analyze the history records.
- ▶ Manual tinting.

Innovation Highlights

▶ Multi-platform

You can control color at any time and anywhere by PC, mobile, tablet, box, web page and Wechat.

▶ Cloud Computing

Cloud computing provides data information you require at anytime and anywhere.

▶ Spectrophotometer integration

You can be a tinting expert by auto color searching and correcting of spectrophotometer even if you are a beginner.

▶ Closed-loop solution

The formula data and customer data are accessible in time through cloud computing when it is needed.

▶ Global Deployment

Global deployment applied in Cloud Management and Web query greatly improves the user experience.
