

## Decorative Paint Software Introduction

ColorExpert 3 is the third generation tinting software independently developed by Santint. The software has great improvements in user interface, formula management, tinting efficiency and fault-tolerant processing, and integrated with powerful tinting cloud function, which provides comprehensive solution.

With ColorExpert 3, you can become a color expert without expertise.

## Main Functions

### 1. Formula Management

- ▶ Support for multi-brand standard formulas.
- ▶ Customize my formula.
- ▶ Random selection query of series, products and color cards.
- ▶ Flexible label design and printing.
- ▶ A multi-strategy supported price system.

### 2. Tinting Management

- ▶ Multi-task queue driver, worry-free tinting.
- ▶ Support manual tinting.
- ▶ Real-time storage and statistical analysis of historical records.
- ▶ Real-time tinting work progress and equipment operation feedback.
- ▶ Comprehensive equipment maintenance and maintenance log statistics.

### 3. Cloud Related\*

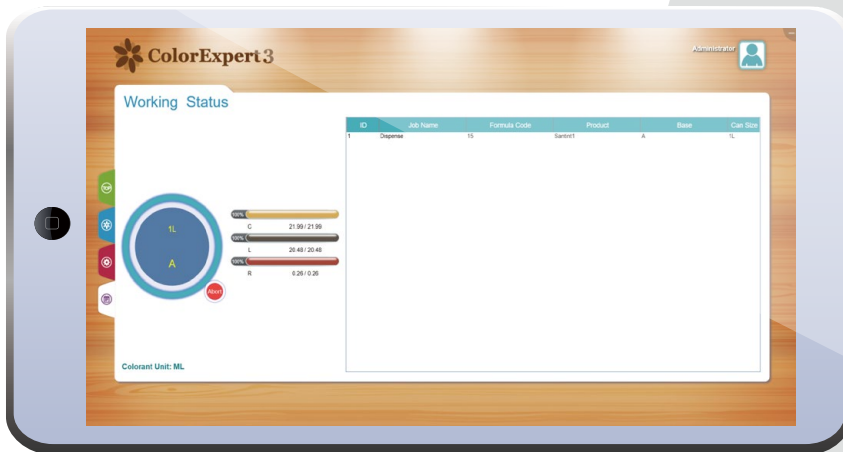

- ▶ Real-time synchronization of formula data.
- ▶ Cloud backup of software configuration and equipment parameters.
- ▶ Real-time upload of equipment operation status.
- ▶ Cloud after-sales service and accessories management.

\*Need to combine with Santint Cloud System

### 4. Others

- ▶ Flexible user authority control.
- ▶ Installation guidance.
- ▶ Multi-language and localization.
- ▶ Personalizeable theme.

## Innovation Highlights

#### ▶ Multi-platform, Multi-terminal

Whether it's windows, Android, PC, mobile, tablet or box, ColorExpert 3 can be all controlled by you.

#### ▶ Top 30 & My Favorite

Manufacturers can promote popular colors through Top 30, and the terminal can intelligently analyze customers' favorites through ColorExpert 3.

#### ▶ Order Mode

Multiple terminals perform their duties for one tinting room, and work becomes more orderly.
