

Santint Cloud System Introduction

SanTint Cloud 3 is a private cloud system developed by Santint through continuously understanding and integrating customers' demands and solving customers' painpoints in decorative paint/auto paint industry.

It provides a complete industry solution, such as shop management, formula synchronization, data push, big data collection and big data analysis for decorative paint/auto paint manufacturers.

Seven Functions

1. Cloud Management

- ▶ Shop management .
- ▶ User management.
- ▶ Formula management.
- ▶ Query management.
- ▶ Global deployment and unified management.
- ▶ Region and structure management.

2. Cloud Storage

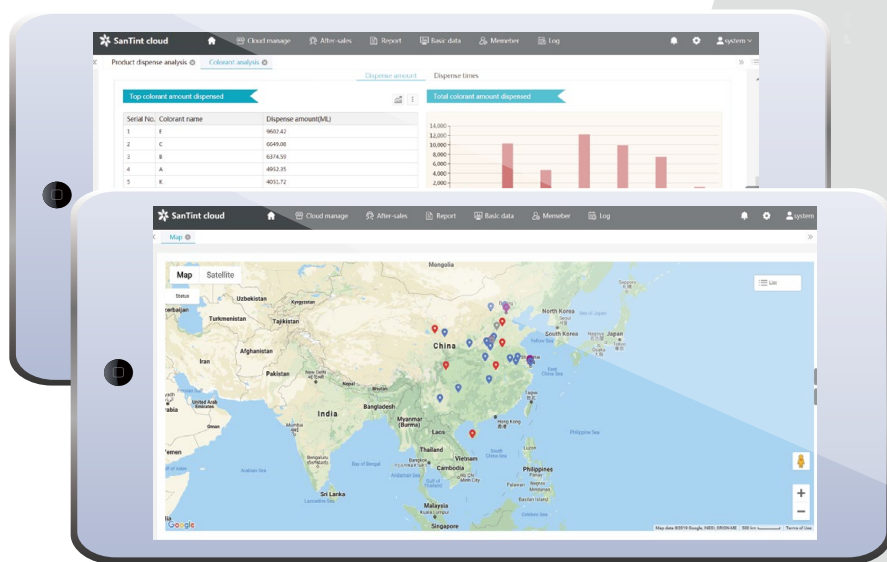

- ▶ Standard formula data storage.
- ▶ Client configuration backup storage.
- ▶ Customers' data storage.
- ▶ Customers' tinting history record storage.

3. Cloud Push

- ▶ Configuration push.
- ▶ News/announcement push.
- ▶ Advertisement push.
- ▶ Label push.
- ▶ User authority push.

4. Cloud Computing

- ▶ Search formula online.
- ▶ Big data collection and computational analysis.

5. Cloud report

- ▶ Tinting data report.
- ▶ Aftersales report.
- ▶ Log report.

6. Cloud Aftersales Service

- ▶ Real-time feedback of machine status.
- ▶ Aftersales progress tracking.
- ▶ Color discrepancy/Aftersales handling.

7. Cloud Accessories

- ▶ Service station management.
- ▶ Warehouse management.
- ▶ Material management.
- ▶ Inventory management.

Cloud System Features

▶ Multi-platform

SanTint Cloud 3 can make functional connection with the platforms of Santint and support all kinds of application integration. Meanwhile, it can connect to customer's system.

▶ Data Security

Adopts SOA framework platform of santint. The reliable communication of framework data and multiple encryption in data transmission ensures data's security.

▶ Reduce Cost

The formula's real-time synchronization and advertisement promotions' real-time delivery solves several issues in decorative paint/auto paint industry such as slow manual update of formula, high input cost and color discrepancy issues and so on.

▶ Shop Management

SanTint Cloud System controls every tinting terminal, to prevent shops from using dispenser out of contract.

▶ Report System

Santint Cloud System quickly collects the tinting data of shops and summarize the tinting volume in each region, ranking of tinting products, ranking of color number tinting, colorant usage amount, proportion of tinting after filling through data computational analysis, which provides data support for marketing & sales and planning.
